

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

1. (CURRENTLY AMENDED) An introduction system for allowing an introduction origin system to introduce an introduction target system to an introduction destination system through an on-line network system,

the introduction origin system comprising an introducing part for notifying the introduction destination system of “introducing” introducing information containing user entry information of the introduction target system,

the introduction destination system comprising a registering part for receiving the “introducing” introducing information notified from the introducing part of the introduction origin system and registering user entry information of the introduction target system on a user list, and an “introduced” introduced information notifying part for detecting registration of the user entry information of the introduction target system on the user list in the registering part and notifying the introduction target system of “introduced” introduced information representing that a registration action based on introduction has been conducted, and

the introduction target system comprising an “introduced” introduced recognizing part for receiving “introduced” introduced information from the “introduced” introduced information notifying part of the introduction destination system and recognizing a registration action to the user list in the introduction destination system.

2. (CURRENTLY AMENDED) An introduction system according to claim 1, wherein the user list is a buddy list,

a buddy list system is configured between the introduction destination system and the introduction target system, based on registration of a user entry of the introduction target system to the buddy list of the introduction destination system,

the introduction target system notifies the introduction destination system of state information representing a state of the introduction target system through-a-network the buddy list system, and

the introduction destination system obtains the state information of the introduction target system through the network-buddy list system and refers to it.

3. (CURRENTLY AMENDED) An introduction system according to claim 1, wherein the introducing part of the introduction origin system has a function of notifying the introduction target system that an “introducing” introducing action has been conducted, and

the introduction target system further comprises an “introducing” introducing recognizing part for receiving “introducing” introducing information notified from the introducing part of the introduction origin system and recognizing the “introducing” introducing action in the introduction origin system based on the “introducing” introducing information, and an “introduction” introduction_confirming part for-comparing contents recognized by the “introduced” introduced recognizing part with contents recognized by the “introducing” introducing recognizing part, and confirming an introduction relationship between the introduction origin system and the introduction destination system.

4. (CURRENTLY AMENDED) An introduction system according to claim 2, wherein the introducing part of the introduction origin system has a function of notifying the introduction target system that an “introducing” introducing action has been conducted, and

the introduction target system further comprises an “introducing” introducing recognizing part for receiving “introducing” introducing information notified from the introducing part of the introduction origin system and recognizing the “introducing” introducing action in the introduction origin system based on the “introducing” introducing information, and an “introduction” introduction_confirming part for-comparing contents recognized by the “introduced” introduced recognizing part with contents recognized by the “introducing” introducing recognizing part, and confirming an introduction relationship between the introduction origin system and the introduction destination system.

5. (CURRENTLY AMENDED) An introduction system according to claim 1, wherein the introduction target system is a service provider, and

the introduction target system includes an incentive providing part for giving an incentive to change conditions for providing service with respect to either one or both of the introduction origin system and the introduction destination system, in a case where the “introduced” introduced recognizing part recognizes an introduction relationship between the introduction origin system and the introduction destination system.

6. (CURRENTLY AMENDED) An introduction system according to claim 2, wherein the introduction target system is a service provider, and

the introduction target system includes an incentive providing part for giving an incentive to change conditions for providing service with respect to either one or both of the introduction origin system and the introduction destination system, in a case where the “introduced” introduced recognizing part recognizes an introduction relationship between the introduction origin system and the introduction destination system.

7. (CURRENTLY AMENDED) An introduction system according to claim 3, wherein the introduction target system is a service provider, and

the introduction target system includes an incentive providing part for giving an incentive to change conditions for providing service with respect to either one or both of the introduction origin system and the introduction destination system, in a case where the “introduced” introduced recognizing part recognizes an introduction relationship between the introduction origin system and the introduction destination system.

8. (CURRENTLY AMENDED) An introduction system according to claim 3, wherein the introduction target system is a service provider, and

the introduction target system includes an incentive providing part for giving an incentive to change conditions for providing service with respect to either one or both of the introduction origin system and the introduction destination system, in a case where the “introduction” introduction confirming part confirms an introduction relationship between the introduction origin system and the introduction destination system.

9. (CURRENTLY AMENDED) An introduction system according to claim 5, wherein the introduction target system includes an incentive notifying part for notifying the introduction origin system or the introduction destination system of contents of an incentive given by the incentive providing part based on a past “introducing” introducing action and registration action or contents of an incentive to be provided by the incentive providing part based a future introduction relationship.

10. (CURRENTLY AMENDED) An introduction system according to claim 6, wherein the introduction target system includes an incentive notifying part for notifying the introduction origin system or the introduction destination system of contents of an incentive given by the incentive providing part based on a past “introducing” introducing action and registration action or contents of an incentive to be provided by the incentive providing part based a future introduction relationship.

11. (CURRENTLY AMENDED) An introduction system according to claim 7, wherein the introduction target system includes an incentive notifying part for notifying the introduction origin system or the introduction destination system of contents of an incentive given by the incentive providing part based on a past “introducing” introducing action and registration action or contents of an incentive to be provided by the incentive providing part based a future introduction relationship.

12. (CURRENTLY AMENDED) An introduction system according to claim 8, wherein the introduction target system includes an incentive notifying part for notifying the introduction origin system or the introduction destination system of contents of an incentive given by the incentive providing part based on a past “introducing” introducing action and registration action or contents of an incentive to be provided by the incentive providing part based a future introduction relationship.

13. (ORIGINAL) An introduction system according to claim 1, wherein in a registering part of the introduction destination system, in a case where the entry information of the introduction target system is deleted from the user list or the introduction destination system is not used by a user any more, recognition or confirmation of the introduction relationship between the introduction origin system and the introduction target system is cancelled.

14. (ORIGINAL) An introduction system according to claim 2, wherein in a registering part of the introduction destination system, in a case where the entry information of the introduction target system is deleted from the user list or the introduction destination system is not used by a user any more, recognition or confirmation of the introduction relationship between the introduction origin system and the introduction target system is cancelled.

15. (ORIGINAL) An introduction system according to claim 3, wherein in a registering part of the introduction destination system, in a case where the entry information of the introduction target system is deleted from the user list or the introduction destination system is not used by a user any more, recognition or confirmation of the introduction relationship between the introduction origin system and the introduction target system is cancelled.

16. (ORIGINAL) An introduction system according to claim 5, wherein in a registering part of the introduction destination system, in a case where the entry information of the introduction target system is deleted from the user list or the introduction destination system is not used by a user any more, recognition or confirmation of the introduction relationship between the introduction origin system and the introduction target system is cancelled.

17. (ORIGINAL) An introduction system according to claim 8, wherein in a registering part of the introduction destination system, in a case where the entry information of the introduction target system is deleted from the user list or the introduction destination system is not used by a user any more, recognition or confirmation of the introduction relationship between the introduction origin system and the introduction target system is cancelled.

18. (CANCELLED)

19. (CURRENTLY AMENDED) A method for allowing an introduction origin system to introduce an introduction target system to an introduction destination system through an on-line network system, comprising:

wherein the introduction origin system notifies-notifying the introduction destination system of "introducing"-introducing information containing user entry information of the introduction target system;

the introduction destination system receives “introducing” receiving the introducing information notified from the introduction origin system and registers registering user entry information of the introduction target system on a user list; and

the introduction destination system detects detecting registration of the user entry information of the introduction target system in a buddy list to the user list, and notifies notifying the introduction target system of “introduced” introduced information representing that the registration action has been conducted; and

the introduction target system receives “introduced” receiving the introduced information notified from the introduction destination system, and recognizes recognizing the registration action to the user list in the introduction destination system, based on the “introduced” introduced information.

20. (CANCELLED)
